If this is the Future of Work, then it is a bleak future. We are wholesale eliminating essential entry level tasks and skills and outsourcing them to machines. The higher level ones too. Do you think that once the AI overlords discover how an algorithm can fix glitches that that human function won't be eliminated? And why are humans the only ones who can sanitize? Is this type of fine-motor ...

Work, in physics, measure of energy transfer that occurs when an object is moved over a distance by an external force at least part of which is applied in the direction of the displacement. If the force is constant, work may be computed by multiplying the length of the path by the component of the force acting along the path. To express this concept mathematically, the work  $W$  is equal to the ...
